

## **Air Quality Protection**

Panasonic Industrial Devices Slovakia s.r.o., located at Oravická 616, 028 01 Trstená, is classified as a large source of air pollution under Act No. 146/2023 Coll.

The company operates production facilities in Trstená and Stará Ľubovňa. Emissions mainly originate from production processes and energy equipment.

We regularly monitor pollutants such as VOCs, NOx, CO, and particulate matter. All measured values are evaluated in accordance with the applicable legal emission limits.

The current data on emitted pollutants for the year 2025 at the facility in **Trstená** (in tonnes) are as follows: Particulate matter (PM): 0,560812; Total organic carbon (TOC): 6,829844; Total carbon monoxide (CO): 0,143894; Nitrogen oxides (NOx): 0,356310;

The current data on emitted pollutants for the year 2025 at the facility in **Stará Ľubovňa** (in tonnes) are as follows: Particulate matter (PM): 0.911546; Total organic carbon (TOC): 14.87088;

Regular monitoring is carried out, and the measured values comply with the permitted legal limits.

The report from regular monitoring and measurements is attached.
